

2019 PRODUCTS

TRAFO FABRIC

The Trafo fabric is a light-weight and durable structured surface material with quick dry and wicking functions.

AIRTECH FABRIC

Properties of AirTech makes it a really smooth fabric and avoids any frictional drag to keep good breathability. This smoothness makes easier any changes in the athlete's posture affecting the angle of incidence between the body and the air flow, which add a global acceleration.

CARBONTECH FABRIC

Wicking fabric is a combination of micro-filament and Resistex Carbon yarn which has been proven to help reduce your core body temperature and lower your heart rate.

SAHARA ITALIAN FABRIC

One of the finest garment from well know Italian brand Borgini, this fabric is 44 gauge mesh structure with a regular square on one side and an irregular structure on the other side. Thanks to his construction it has a really good snagging and abrasion resistance, high breathability and a quick-dry effect.
