## ULTRA AERO SIRIO FABRIC

The Ultra Aero fabric Combined with the Ultra Aero Sirio totally together make this speed bib the fastest in the world. They change significantly the morphological surface under tension. The aerodynamic drag can be reduced up to 40% compared to a smooth-surface fabric. This special upshot affects the property and increases the overall aerodynamic behaviour of the product.

## SHIELD ENDURANCE FABRIC

This opaque material was designed specifically for full print bottoms. A 240 gram fabric that utilizes a proprietary warp knitting process, resulting in the strongest printable polyester on the market thereby helping to extend the life of your full print cycling garments, as well as retaining comfort in the process.

## ULTRA AERO SIRIO FABRIC

The Ultra Aero fabric Combined with the Ultra Aero Sirio totally together make this speed bib the fastest in the world. They change significantly the morphological surface under tension. The aerodynamic drag can be reduced up to 40% compared to a smooth-surface fabric. This special upshot affects the property and increases the overall aerodynamic behaviour of the product.

## RED P-ENDUR PAD

Men's specific chamois designed for short/medium distances and made from a 10 millimeter, standard density perforated Italian foam with rounded laser-cut edges. Col fabric is a soft, smooth and 4-way stretch material.

## NUDA ITALIAN PAD

Men's specific chamois designed for long distances and made from a 12 millimeter, high-density Italian foam with rounded laser-cut edges. Zero friction Bio-Ceramic fabric is antibacterial and comfortable as the pad is much lighter than the traditional ones.

## DOLOMITI PAD

Italian made pad intended for competition with a base foam of 65 Kg /m<sup>3</sup> and a vv thickness, assuring great freedom of movement and an amazing elasticity with no abrasion or discomfort thanks to the carving technology. The internal foam has a high density which guarantees excellent protection.
